

# SumArray

March 14, 2020

## 1 Python Program To Find Sum of Array

```
[2]: Age = [10, 12, 13]      #Inputting Array values.
     theSum = 0             #Definig variable to store the sum of array.
     for i in Age:         #For loop to iterate through the array
         theSum = theSum + i  #Adding array elements.

     print(theSum)        #Outputting the sum of array elements.
```

## 2 Python Program To Find Sum of Array Using Function.

```
[7]: Age = [10, 12, 13]
     def sumArray():
         addition = 0
         for i in Age:
             addition = addition + i
         print(addition)
     sumArray()
```
